Locked Out or Lost Keys

Supreme Lock Solutions Ltd., using the latest technology and techniques, will gain entry to your house with the minimum of fuss. As a professional locksmith service we will open your door by picking or drilling the lock, keeping any potentially costly damage to the surrounding door to a minimum.

Locked Out - Keys Inside?

In most cases, we can gain entry to your locks without having to change the lock, enabling the continual use of your existing set of keys. We can help if you have accidentally left your keys in your house and are now locked out.

Locked Out - Lost Keys?

If you are locked out and lose your keys, opening your door will depend on the type of lock on the door:

Cylinder Rim Locks

If you lose keys to a cylinder rim lock our locksmith will try and pick the cylinders where possible; if this is not possible we would most probably have to drill the lock to open the door and then change the lock cylinder. Cylinder changes on locks are generally inexpensive.

Mortise Locks

If you lose keys to a mortise lock our professional locksmith will usually drill the lock to gain entry, replace the lock, and provide a new set of keys. Alternatively, our professional locksmith could pick the lock to gain entry and then make a new key for the lock, however, making keys is more time consuming and therefore often the more expensive option.

Suited or Restricted Systems

If you lose a key to a suited or restricted lock we can replace your suited lock or order a new key on your behalf (certain limitations may apply). Supreme Lock can duplicate most key types, either in our locksmith's fully-equipped mobile van, or in our shop. We can also special order keys.
